
AI Social Researcher
Comprehensive Default Scenarios
Evolvable Simulation
Logical Features
Code-free Scenario Construction
Large-scale Simulation
Scenario Auto-Construction Subsystem
User Input
Scenario Formalization
ODD Protocol
Behavior Graph
Scenario Specification
Specified Scenario
Behavior Graph Construction
Code Generation
Executable Code
Simulation Subsystem
Simulation Execution
Flexible agent and environment configuration
Responsive agent framework
Distributed simulation architecture
Simulation Management
Agent profile manipulation
Real-time monitoring
Broadcast global information
Direct interaction
Feedback-driven Evolving Subsystem
Prompt-response Pair
Verifier
Score
